Gateway to Happiness

“No gift is better than the gift of education and no accomplishment is greater than providing this gift to someone.”

-Asif Mujtaba

In our fight against hatred, violence, and socio-economic deprivation, we often sideline the children. We tend to forget that they are the most affected ones. Their families struggle harder even for their basic needs. When fulfilling the basic necessities becomes so burdensome, getting a quality education for their kids becomes a far-fetched dream. Besides, due to lack of awareness, they barely pay any heed to their education and as a result, a large chunk of kids does not get access to quality education.

As concerned citizens, we always talk about bringing a change for these kids and the best way would be to provide them with a quality education. But the question arises as to how? Is there any reliable platform that can become a catalyst of change by taking up one such colossal responsibility? Well, Shagird is one such platform that is working tirelessly for the deprived children under the mentorship program so that they can get their education properly and secure their future.

Under Shagird, there are different categories of the underprivileged and marginalized children as,

1. Kids orphaned in the communal violence
2. Other victim kids of the violence
3. Economically backward children
4. Others

If you want to make any contribution in bringing a change in the lives of these poor kids by sponsoring their education (the sponsoring amount varies with the geographical location of the child as the cost of education is different in cities, towns, and villages), we kindly request you to sign up for the mentorship program. Every mentor may adopt kids (as many as they want) for sponsoring their education. After due approval and after the payment of the sponsoring amount (monthly, quarterly, yearly, etc.). A unique login ID and Password would be provided to each mentor so that they would be able to check up on their educational progress. Additionally, if they want to communicate with the family of the adopted kid, it may be arranged too.

Shagird works on the principle dream of ‘Kulsum Sayani’ an inspirational pioneer worker in the field of adult literacy in India who gave the famous slogan “each one teach one”. The vision is to have a million mentors over the years so that a million kids would reap the benefits of education and skill development.

The Vision of SHAAGIRD

- 1) M2S foundation has prepared a database of large number of kids who are either victims of the communal violence or they belong to economically backward families. For the families, even fulfilling their basic needs have become burdensome and hence they do not get any access to quality education.

- 2) Every individual is requested to adopt these kids (as many as they want) for sponsoring their education. Also, the cost of the education would vary as the geographic location of these kid varies.

- 3) The kids stay with their families. A unique login ID and password will be provided to the mentors to login to www.shaagird.org so that mentors would be able to go through their educational progress on a regular basis.

- 4) Moreover, these kids would be encouraged to pursue their higher studies in their field of interest.

- 5) They will also be taught some professional courses like coding, Robotics, Graphics Designing and many more.
